# Fire Extinguisher Sales & Services

Provides a variety of equipment in multiple sizes and brands for commercial/residential buildings, warehouses, schools, restaurants, and construction sites. Including, specialty fire extinguishers and equipment.

# About Safety Supplies Unlimited

SSU is a full-service safety supply and fire protection company, operating online and in 3 locations in NY & NJ.

Established more than 10+ years ago, SSU offers our construction clients safety supplies, personal protective equipment (PPE) and fire safety equipment/ servicing.

SSU is a certified Women's Business Enterprise (NY/NJ/PA)

We understand the importance of current and new safety guidelines and regulations enforced by OSHA, FDNY, or DOB. We work closely with clients to select the right equipment and supplies to ensure a safe work environment.

# Fire Extinguisher Sales, Lease & Service Needs

SSU is fully licensed to sell & service portable fire extinguishers in NY and NJ. We offer clients fire extinguisher purchase and leasing programs in the NYC and NJ area.

We provide monthly inspections, annual inspections, refills, 6 year maintenance and 12 year hydro testing. We also offer a swap out plan for clients by providing temporary fire extinguishers while we repair non working units.

SSU carries signage, cabinets, and other fire safety supplies offered to companies to remain in compliance with FDNY.

At no additional fee, we offer a cloud-based program that tracks fire extinguishers, maintenance inspection dates, and gives clients access to inspection reports through a web portal.

THE NEW FDNY RULE  
NOW REQUIERES FDNY  
ISSUED TAGS ON ALL  
FIRE EXTINGUISHERS.

THE NEW RULE WLL BE  
ENFORCED ON 10/1/18

CONTACT SSU AND WE  
WILL SCHEDULE A  
SERVICE CALL TO  
ENSURE YOUR TAGS  
ARE REPLACED.

## Fire Safety Awareness Breakfast

Chris O'Donnell

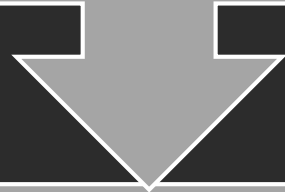

TSC Fire Safety Supervisor

# Construction Site Fire Safety Manager

TSC is the leader in Construction Site & Fire Safety services. Most TSC FD personnel are retired FDNY Chiefs, Officers and firefighters with many Jersey City firemen. Our familiarity with the operations and nuances of the FDNY is integral to help companies run a smooth and efficient safe construction site.

TSC Construction Safety Fire Safety Managers (CSFSM) bring their fire safety expertise and enthusiasm into ensuring that all phases of the construction process are compliant with the NYC Fire Code and DOB Chapter 33 fire safety regulations. The team's knowledge of fire safety and experience in emergency situations makes TSC the clear choice in choosing a CSFSM to manage fire safety on site.

# CSFSM Major Building Sites

- Madison Square Garden Transformation for Turner Construction
- World Trade Center Buildings 1 and 3 for multiple contractors
- Jacob K. Javits Convention Center Renovation
- Macy's Herald Square for Structure Tone, Inc.
- NYU Turner Construction
- 100 Willoughby Street for Plaza Construction
- MTA 2<sup>nd</sup> Avenue Subway Q Line
- Hudson Yards on Manhattan's West Side

\*Currently on more than 20 active job sites in NYC today!

# Fire Guard Personnel

---

- TSC provides FDNY certified F-01 Fire Guards for citywide impairment needs. Fire guards are needed whenever you impair any part of a fire sprinkler standpipe or alarm system. One fireguard can cover up to 50,000 square feet on site.
- TSC Fire Guards are mostly retired FDNY and Jersey City Chief Officers and Firefighters, along with retired NYPD personnel.
- TSC not only holds the required F-01 but most are overqualified having the S-56 CSFSM certs as well as multiple OSHA and DOB training certs.
- TSC can supply any amount of fireguards on a very short notice.

# Fire Guard Previous Sites

- Madison Square Garden Renovation for Turner Construction
  - Up to 10 fire guards 24/7
- Macy's Herald Square for Structure Tone
  - 14 fire guards 24/7
- MTA 2<sup>nd</sup> Avenue Subway, Q Line for MTACC
  - 12 fire guards 24/7
- NYPD Police Academy for Turner Construction
  - 8 fire guards 24/7

- 1408.1 Fire Safety Manager – Where a Site Safety Manager or Site Safety Coordinator is required by the Building Code, the owner shall designate a person to be the fire safety manager for the construction site.
- 3 RCNY Part 1408 – A Construction Site Fire Safety Manager shall be present at the construction site at all times when construction, demolition and alteration work is being conducted.
- 1408.2 Pre-Fire Plans
- 1408.3 Training
- 1408.4 Fire Protection Devices
  - The Fire Safety Manager shall ensure that all fire protection equipment and systems are readily available and periodically inspected and tested, and maintained in accordance with this code, the rules and the Building Code.
- 1408.5 Hot Work Operations
- 1408.6 Impairment of fire protection systems

# Standpipe Requirements

Building Code  
Section BC3303.8:  
Air Pressurized  
Alarm System for  
Standpipes  
(previously  
required by Local  
Law No. 64/2009)

- New Buildings and structures (BC3303.8)
  - All required permanent or temporary standpipes shall be in a state of readiness once the work reaches a height greater than 75 feet and shall contain an air pressurized alarm system.
- Demolitions (BC3303.8)
  - In vacant buildings and structures undergoing a full demolition, all existing standpipes shall be maintained in a state of readiness as a dry standpipe system and shall be provided with an air pressurized alarm system.

# Standpipe

- Location of risers and connections
- Proper signage
- Unobstructed
- OS & Y chained in open position

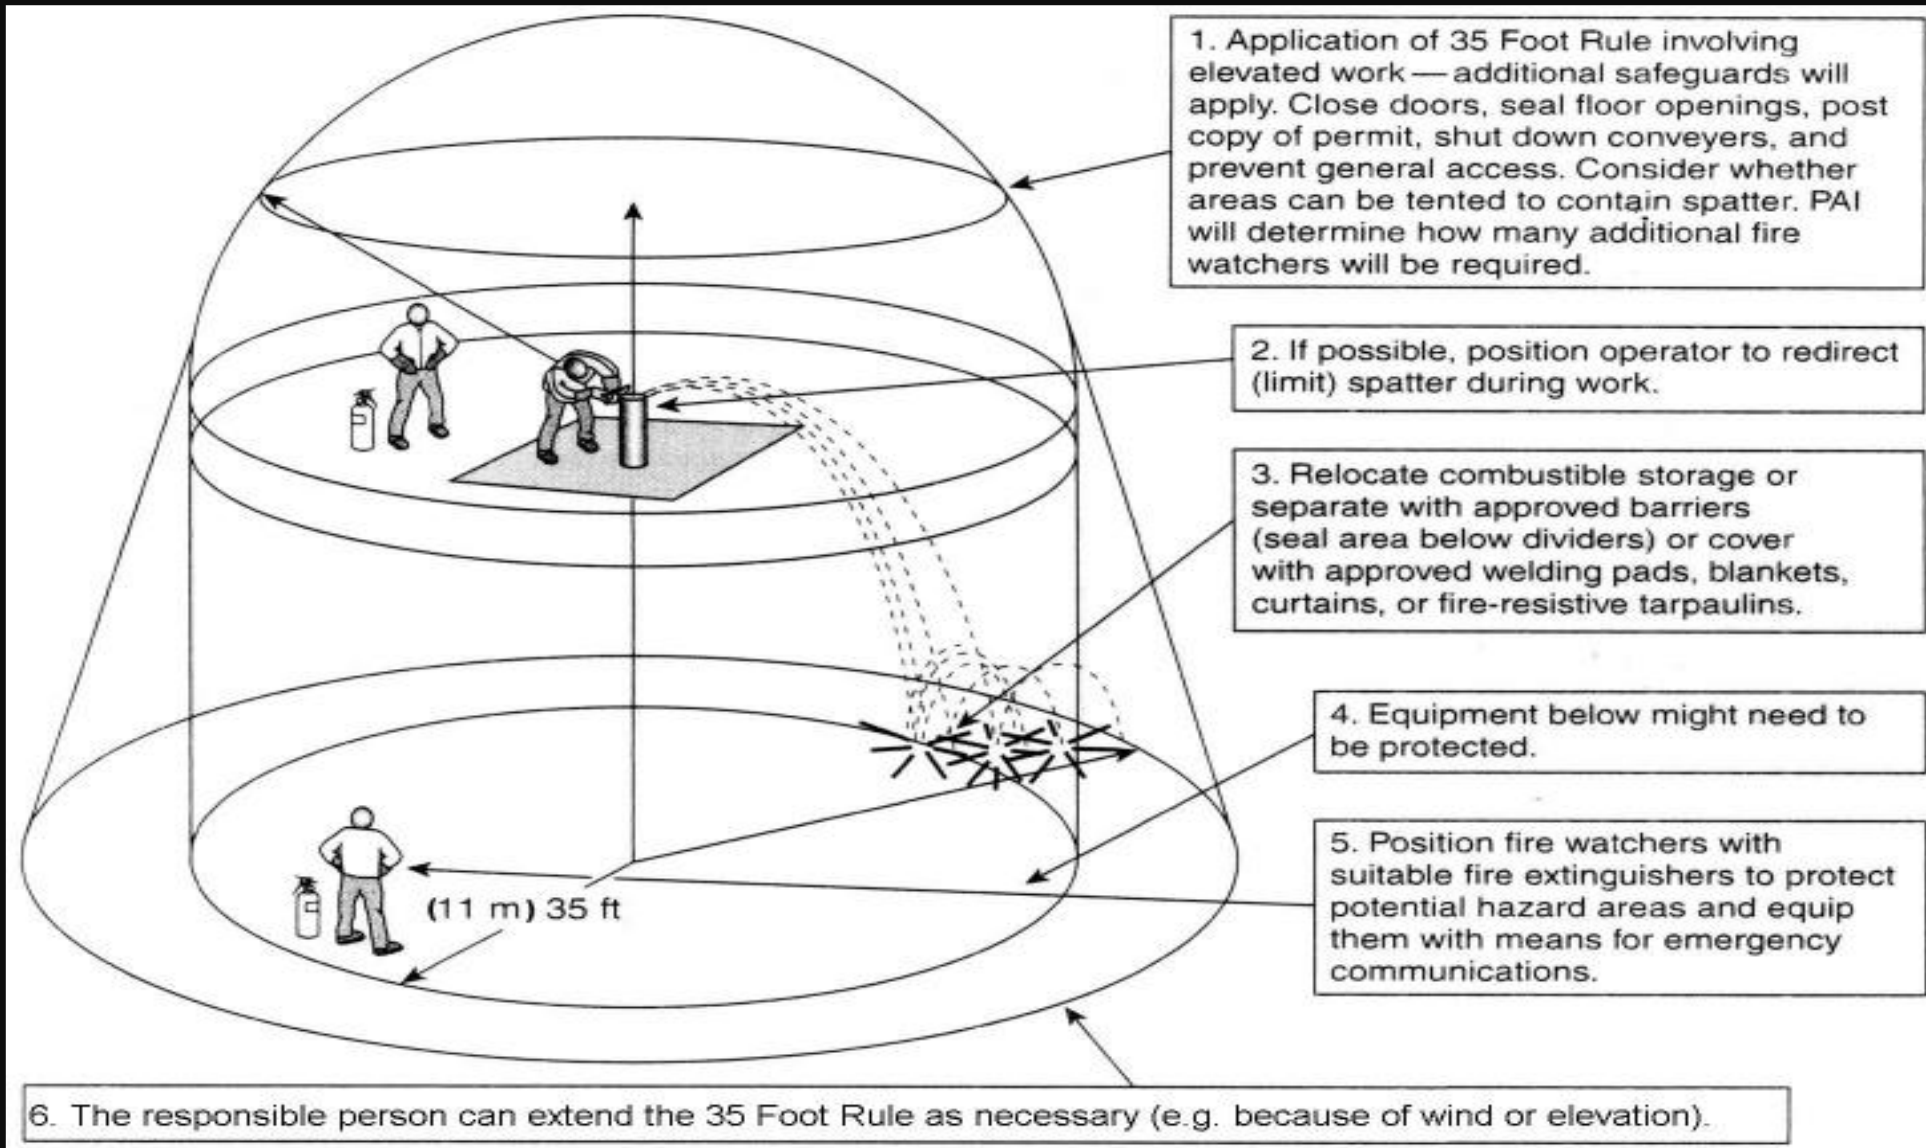

# Hot Work Authorization Requirements

- All hot work authorizations are to be issued daily and are required at all times for hot works, such as cutting, welding, thermite welding, brazing, soldering, grinding, thermal spraying, thawing pipe, cadwelding, installation of torch-applied roof systems or any other similar operation or activity.
- The CSFSM may serve as the responsible person or should ensure that such person is designated and monitoring the hot work operations. The CSFSM should have copies of all FDNY hot work permits and hot work authorizations, which shall be kept onsite by the CSFSM.
- Hot work operations are limited to the area and time specified in the hot work authorization.

The pre-hot work shall be conducted at least once per day.
